

Education

- 2009 **University of Pittsburgh**
Ph.D. in Neuroscience and affiliated with the Center for the Neural Basis of Cognition and Carnegie Mellon University
- 2003 **University of California, Berkeley**
B.A. in Cognitive Science (Highest Honors)

Research and Work Experience

- 2019 – *Present* Associate professor at the Center for Molecular & Behavioral Neuroscience (CMBN), Rutgers University-Newark. Director of the Cole Neurocognition Laboratory
- 2014 – 2019 Assistant professor at the Center for Molecular & Behavioral Neuroscience (CMBN), Rutgers University-Newark. Director of the Cole Neurocognition Laboratory
- 2012 – 2013 Post-doctoral research with Steven Petersen (Neuroscience, Radiology, & Psychology, Washington University in St. Louis)
Investigations of brain network organization and cognitive control
Methods: fMRI, functional connectivity, graph theory
- 2009 – 2013 Post-doctoral research with Todd Braver & Deanna Barch
(Department of Psychology, Washington University in St. Louis)
Investigations of prefrontal cortex, cognitive control, learning, schizophrenia, & intelligence
Methods: fMRI, machine learning, functional connectivity, individual differences, behavior
- 2004 – 2009 Ph.D. research with Walter Schneider (Department of Psychology, University of Pittsburgh)
Investigations of prefrontal cortex, cognitive control, & learning/memory
Methods: fMRI, MEG, EEG, behavior, functional connectivity, computational modeling
- 2001 – 2004 Undergraduate and post-baccalaureate research with Mark D'Esposito (Neuroscience and Psychology, UC Berkeley)
Investigations of prefrontal cortex and cognitive control
Methods: fMRI, GLM analysis, event-related time series analysis
- 2003 Undergraduate research with William DeBello (Neuroscience, UC Davis)
Investigations of the genetic basis of learning and memory
Methods: PCR, analysis of gene expression, gene sequence identification
- 2001 – 2003 Software engineering and web development for Apple, Inc.

Honors and Awards

- 2019 Cognitive Neuroscience Society's Young Investigator Award
"Recognizes outstanding contributions by scientists early in their career"
- 2018 Center for the Neural Basis of Cognition (CNBC) Alumni Lecture (Pittsburgh, PA)
- 2015 – 2020 Elected to be member of the Cognitive Neuroscience Society's Symposium Committee

- 2011 Fellow at the Summer Institute in Cognitive Neuroscience, Santa Barbara, CA
- 2010 NeuroImage Editor's Choice Award
For Cole et al. 2010, "Identifying the brain's most globally connected regions"
Awarded by the editors in acknowledgment of a study's importance and high impact
- 2007 National Science Foundation Integrative Graduate Education and Research Traineeship (IGERT) Fellowship
Awarded to science graduate students "who will pursue careers in research and education, with the interdisciplinary backgrounds, deep knowledge in chosen disciplines, and technical, professional, and personal skills to become leaders and creative agents for change."
- 2005 – 2008 National Science Foundation Graduate Research Fellowship
Awarded to graduate students whose plans for research have "intellectual merit and beneficial implications for society"
- 2003 Highest Honors in Cognitive Science at UC Berkeley
Awarded highest honors based on significant contribution to a research project and high quality honors thesis as judged by professors Mark D'Esposito, M.D. and Robert Knight, M.D.

Organizational Leadership and Professional Memberships

- 2018 – Present Associate Member of the Institute for Brain and Neuroscience Research (New Jersey Institute of Technology)
- 2016 – Present Founder and organizer (along with Drew Headley) of the Integrative Neuroscience Discussion Group (INDG) at the Center for Molecular & Behavioral Neuroscience. This is a group that seeks to develop unified understandings between human and non-human (animal and computational models) neuroscience and psychology.
- 2015 – Present Member and co-organizer of Newark Brain Connectivity meetings. These meetings bring together scientists interested in brain connectivity research from Newark, NJ and the surrounding region (such as neuroscientists and psychologists from Rutgers University and New Jersey Institute of Technology).
- 2004 – Present Society for Neuroscience
Cognitive Neuroscience Society
- 2010 – Present Psychonomic Society
- 2009 – Present Neuroethics Society
- 2006 – Present Organization for Human Brain Mapping
- 2004 – 2009 Center for the Neural Basis of Cognition, Carnegie Mellon & University of Pittsburgh
Center for Neuroscience, University of Pittsburgh
Learning Research and Development Center
- 2006 – 2007 President of the Department of Neuroscience Graduate Student Organization, University of Pittsburgh
- 2002 – 2003 President of the Cognitive Science Student Association, UC Berkeley

Research Grants and Fellowships

- Co-Principal Investigator: "Major Research Instrumentation: Acquisition of a 3T SIEMENS PRISMA at RUBIC: The Evolution to a Regional Center", National Science Foundation – Division of Behavioral & Cognitive Sciences (BCS) 1919873, PI: Stephen Hanson, Total cost: \$1,484,000 2019-2021
- Co-Principal Investigator: "Major Research Instrumentation: Acquisition of a GPU cluster to support interdisciplinary research in human learning, machine learning, and data science", National Science Foundation – Division of Behavioral & Cognitive Sciences (BCS) 1828528, PI: Patrick Shafto, Total cost: \$99,999 2018-2021
- Co-Investigator: "Imaging the effects of psychosocial stress on cognitive performance", National Science Foundation – Division of Behavioral & Cognitive Sciences (BCS) 1756065, PI: Elizabeth Tricomi, Total cost: \$408,699 2018-2020
- Co-Investigator: "Prescription opiate, drug-cue processing network, and neural connectivity", National Institutes of Health – National Institute on Drug Abuse (I/START R03 DA044496), PI: Suchismita Ray, Total direct cost: \$161,644. Status: Completed. 2017-2018
- Principal Investigator: "Brain Network Mechanisms of Aging-Related Cognitive Decline", National Institutes of Health – National Institute on Aging (R01 AG055556), Total direct cost: \$250,000/year 2017-2022
The goal of this research is to identify network mechanisms that can account for the alterations in both intrinsic brain connectivity and cognitive task activations that occur with aging-related decline of cognitive control abilities among healthy older adults.
- Principal Investigator: "Brain Network Mechanisms of Instructed Learning", National Institutes of Health – National Institute of Mental Health (R01 MH109520), Total direct cost: \$250,000/year 2016-2021
The goal of this research is to utilize the tools of network neuroscience to improve understanding of how instructed learning is implemented in the human brain, from initial learning to expertise.
- Co-Principal Investigator: "Integrated Framework for Studying Proactive Control in Rapid Instructed Task Learning", United States – Israel Binational Science Foundation (BSF 2015186), Total cost: \$200,000 2016-2020
- Collaborator: "Neuropsychiatric Classification via Connectivity and Machine Learning", National Institutes of Health (NIH) – National Institute of Mental Health (R03 MH105765), PI: Alan Anticevic, Total cost: \$74,000/year. Status: Completed. 2014-2016
- Principal Investigator: "Network Mechanisms of Flexible Cognitive Control", National Institutes of Health – National Institute of Mental Health (K99-R00 MH096801), Total direct cost: \$157,000/year. Status: Completed. 2012-2017
This project investigates the hypothesis that flexible cognition and behavior is supported by flexible hubs – frontoparietal brain regions with extensive global brain connectivity that flexibly updates according to task demands.
- Principal Investigator (fellowship): "Beyond Localization of Memory Functions: Learning Statistical Methods for Estimating Directed Connectivity among Cortical Regions Using Multiple Neuroimaging Technologies", National Science Foundation (IGERT Fellowship), Funded amount: \$30,000. Status: Completed. 2007
The goal of this research is to learn methodological techniques for estimating directed functional (effective) connectivity and empirically test the efficacy of those techniques using functional MRI and magnetoencephalography.
- Principal Investigator (fellowship): "Dissociating the Network Components Underlying Cognitive Control", National Science Foundation (Graduate Research Fellowship), Funded amount: \$90,000. Status: Completed. 2005-2008

The goal of this project is to utilize experimental manipulations of cognitive control processes with functional MRI to identify the shared and specialized roles of cognitive control network brain regions.

Invited Talks and Symposia

1. **Cole M.W.** (November, 2019). Brain network organization as the computational architecture of cognition. Invited talk presented at the Montreal Neurological Institute-Hospital (MNI), Montreal, Quebec, Canada.
2. **Cole M.W.** (November, 2019). Brain network organization as the computational architecture of cognition: Implications for mental health. Invited talk presented at the Rutgers-Princeton Center for Computational Cognitive Neuro-Psychiatry, Piscataway, NJ.
3. **Cole M.W.** (November, 2019). Brain network organization as the computational architecture of cognition: Implications for emotion regulation and mental health. Invited virtual talk presented at the Sapiens Labs' Inter and Intra Person Variability Symposium.
4. **Cole M.W.** (May, 2019). Brain network organization as the computational architecture of cognition: Implications for emotion regulation and mental health. Invited talk presented at the Social & Affective Neuroscience Society conference, Miami, FL.
5. **Cole M.W.** (March, 2019). Brain network organization as the computational architecture of cognition. Invited talk presented at the Cognitive Neuroscience Society conference, San Francisco, CA.
6. **Cole M.W.** (March, 2019). Brain network organization as the computational architecture of cognition. Invited talk presented at Georgia Institute of Technology, Atlanta, GA.

7. **Cole M.W.** (April, 2018). The Cognitive and Computational Relevance of Functional Brain Networks. Invited talk presented at New York University (NYU) School of Medicine, New York, NY.
8. **Cole M.W.** (April, 2018). The Cognitive and Computational Relevance of Functional Brain Networks. Invited CNBC Alumni Talk presented at the Center for the Neural Basis of Cognition (CNBC), University of Pittsburgh and Carnegie Mellon University, Pittsburgh, PA.
9. **Cole M.W.** (November, 2017). Neural and cognitive bases of rational and critical thinking. Invited talk presented at Columbia University, New York, NY.
10. **Cole M.W.** (March, 2017). The Cognitive Relevance of Functional Brain Networks. Invited talk presented at Carnegie Mellon University, Pittsburgh, PA.
11. **Cole M.W.** (February, 2017). Stable and Dynamic Functional Brain Network Architectures Underlying Flexible Cognition. Invited talk presented at Vanderbilt University, Nashville, TN.
12. **Cole M.W.** (November, 2016). Functional Brain Network Mechanisms Underlying Flexible Cognitive Control. Invited talk presented at the Control Processes Conference in San Diego, CA.
13. **Cole M.W.** (October, 2016). Stable and Dynamic Functional Brain Network Architectures Underlying Flexible Cognition. Invited talk presented at the Cognitive Neuroscience Seminar Series at Taub Institute, Columbia Medical School, New York, NY.
14. **Cole M.W.** (June, 2016). Brain network mechanisms of rapid instructed task learning. Invited talk presented at the Attention & Performance Conference, Turnhout, Belgium.
15. **Cole M.W.** (May, 2016). Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at Humboldt University, Berlin, Germany.
16. **Cole M.W.** (July, 2015). Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at the Dresden Symposium on Volition and Cognitive Control, Dresden, Germany.
17. **Cole M.W.** (April, 2015). Flexible Learning: Understanding Cognitive Control and Intelligence in the Brain. Talk presented at Rutgers Research Day, Newark, NJ.
18. **Cole M.W.** (March, 2015). Human brain network dynamics and goal-directed cognition. Talk presented at Newark NeuroTalks, Newark, NJ.
19. **Cole M.W.** (November, 2014). Functional connectivity differences in brain networks: contributions of shared and unshared variance. Invited talk presented at the Asilomar conference, Pacific Grove, CA.
20. **Cole M.W.** (August, 2014). Multi-task functional connectivity and flexible hubs. Invited talk presented at the International Conference on Cognitive Neuroscience (ICON), Brisbane, Australia.
21. **Cole M.W.** (June 20, 2014). Intrinsic and dynamic brain network architectures underlying adaptive behavior in humans. Invited talk presented at the Princeton Neuroscience Institute, Princeton, NJ.
22. **Cole M.W.** (May 14, 2014). Intrinsic and task-evoked network architectures of the human brain. Invited talk presented at the Nathan S. Kline Institute (NKI), Orangeburg, NY.
23. **Cole M.W.** (May 10, 2014). Flexible Thinking: Understanding Cognitive Control and Intelligence in the Brain. Invited talk presented at the Learning and the Brain conference, New York, NY.
24. **Cole M.W.** (November 7, 2013). Intrinsic and Dynamic Network Architectures of the Human Brain. Invited talk presented at the Psychology Department, UC Berkeley, Berkeley, CA.
25. **Cole M.W.** (April 8, 2013). Brain Network Mechanisms of Flexible Cognitive Control in Health and Disease. Invited talk presented at the Department of Psychiatry, Yale, New Haven, CT.
26. **Cole M.W.** (January 15, 2013). Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at the McGovern Institute for Brain Research, MIT, Cambridge, MA.
27. **Cole M.W.** (December 14, 2012). A role for the brain network mechanisms of flexible cognitive control in human intelligence. Invited talk presented at the International Society for Intelligence Research, San Antonio, TX.
28. **Cole M.W.** (November 9, 2012). Global Brain Connectivity and Other Graph Theoretical Approaches: Methods and Findings. Invited talk/workshop presented at the MRI Users' Meeting Group, The Ohio State University, Columbus, OH.

29. **Cole M.W.** (November 7, 2012). Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at the Center for Molecular and Behavioral Neuroscience, Rutgers, Newark, NJ.
30. **Cole M.W.** (March 18, 2011). Investigating Global Brain Connectivity: Methods, Software, and Findings. Talk presented at the Neuroimaging Informatics and Analysis Center seminar series, Washington University, St. Louis, MO.
31. **Cole M.W.** (March 3, 2010). Multiple Network Mechanisms Underlying Flexibility in Prefrontal Cortex. Talk presented at the Brain, Behavior, and Cognition seminar series, Washington University, St. Louis, MO.
32. **Cole M.W.** (January 4, 2010). Network Mechanisms Underlying Flexibility in Prefrontal Cortex. Invited talk presented as part of the Center for Mind and Brain seminar series, UC Davis, Davis, CA.
33. **Cole M.W.** (May 13, 2008). Source Localization with MEG: An MNE Software Overview. Talk presented for the University of Pittsburgh MEG center, Pittsburgh, PA.
34. **Cole M.W.** (January 22, 2008). Connectomics of the Human Cognitive Control Network. Invited talk presented for Beatriz Luna's lab, Pittsburgh, PA.
35. **Cole M.W.** (October 28, 2006). Using Functional MRI to Inform Neural Models of Decision Making. Talk presented at the annual CNBC retreat, Pittsburgh, PA.
36. **Cole M.W.** (October 2, 2006). Specialization and integration within a cortical cognitive control network. Talk presented at the CNBC 'Brain Bag', Pittsburgh, PA.
37. **Cole M.W.** (March 27, 2006). Innate functional connectivity from resting state linear correlations. Invited talk presented at the Clinical Cognitive Neuroscience Lab's Methods Monday forum, Pittsburgh, PA.
38. **Cole M.W.** (November 2, 2005). Dissociations in Cognitive Control: The Specialized Roles of Lateral and Medial Prefrontal Cortex. Talk presented at the Cognitive Psychology 'Brown Bag', Pittsburgh, PA.
39. **Cole M.W.** (October 1, 2005). Results and statistics in fMRI. Talk presented at the 2005 CNBC fMRI Workshop, Pittsburgh, PA.

Published Abstracts and Presentations

1. Schultz D.H., Ito T., **Cole M.W.** (October, 2019). *Cognitive control networks balance domain generality and specificity in representing task rule information across multiple cognitive domains*. Poster presented at the Society for Neuroscience Conference.
2. Ito T., Yang G.R., Cocuzza C.V., Schultz D.H., **Cole M.W.** (June 2019). *Predicting motor behavior using neural encoding models during complex cognitive tasks*. Poster presented at the Organization for Human Brain Mapping conference, Rome, Italy.
3. Cocuzza C.V., Ito T., **Cole M.W.** (June 2019). *Intrinsic connectivity-based encoding models predict naturalistic visual representations*. Poster presented at the Organization for Human Brain Mapping conference, Rome, Italy.
4. Mill R.D., Hamilton J.L., Winfield E.C., Lalta N., Chen R.H., Spronk M., **Cole M.W.** (June 2019). *Decoding task information with high spatiotemporal precision in source EEG networks*. Poster presented at the Organization for Human Brain Mapping conference, Rome, Italy.
5. **Cole M.W.**, Mill R.D., Ito T., Sanchez-Romero R. (March, 2019). The centrality of causal inference to cognitive and network neuroscience. Talk presented at the Cognitive Neuroscience Society conference, San Francisco, CA.
6. Mill R.D., Gordon B.A., Balota D.A., & **Cole M.W.** (September, 2018). Predicting dysfunctional aging-related task activations from resting-state network alterations. Poster presented at the Resting State and Brain Connectivity conference, Montreal, Canada.
7. Cocuzza C.V., Hamilton J., Winfield E., Bassett D.S., **Cole M.W.** (September, 2018). A Network Science Cartography of Cognitive Control System Dynamics. Poster presented at Cognitive Computational Neuroscience, Philadelphia, PA.
8. Ito T, Keane BP, Mill RD, Chen RH, Hearne LJ, Arnemann KL, He BJ, Rotstein HG, **Cole MW** (September, 2018). A dynamical systems model of intrinsic and evoked activity, variability, and

- functional connectivity. Poster presented at Conference on Cognitive Computational Neuroscience, Philadelphia, PA.
9. Ito T, Rotstein HG, **Cole MW** (July, 2018). A dynamical systems model of intrinsic and evoked activity, variability, and functional connectivity. Poster presented at Neurobiology of Cognition Gordon Research Conference, Newry, MA.
 10. Ito T, **Cole MW** (June, 2018). Dimensionality of intrinsic network connectivity underlies flexible task representation. Poster presented at the Organization for Human Brain Mapping, Singapore.
 11. Mill, R.D., Gordon, B.A., Balota, D.A., **Cole, M.W.** (June, 2018). Predicting dysfunctional aging-related task activations from resting-state network alterations. Poster presented at the Organization for Human Brain Mapping conference, Singapore.
 12. Ito T. & **Cole M.W.** (November, 2017). Cognitive control networks contain a mixture of diverse connectivity patterns characteristic of predicted flexible hub mechanisms. Poster presented at the Society for Neuroscience, Washington, DC.
 13. Schultz D., Ito T., Solomyak L., Chen R., Mill R., Kulkarni K., **Cole M.W.** (November, 2017). Systematic flexibility of global functional connectivity patterns supports flexible cognitive control. Poster presented at the Society for Neuroscience, Washington, DC.
 14. **Cole M.W.** & Ito T. (September, 2017). Computational Network Mechanisms of Task-Evoked Functional Connectivity. Poster presented at Cognitive Computational Neuroscience, New York, NY.
 15. **Cole M.W.**, Schultz D., Mill R. (June, 2017). Activity flows over intrinsic and task-evoked functional networks shape cognitive task activations. Talk presented at the Organization for Human Brain Mapping, Vancouver, Canada.
 16. **Cole M.W.**, Ito T., Schultz D.H., Mill R.D. (March, 2017). Activity flows over task-evoked networks shape cognitive task activations across task switches. Poster presented at Cognitive Neuroscience Society, San Francisco, CA.
 17. Ito T., Schultz D., Solomyak L., Chen R., Mill R., **Cole M.W.** (November, 2016). Cognitive control networks route task information to other networks via intrinsic functional connectivity pathways. Poster presented at the Society for Neuroscience, San Diego, CA.
 18. Mill R., Bagic A., Schneider W., **Cole M.W.** (November, 2016). Network signatures of flexible cognitive control are reflected in oscillatory MEG source connectivity. Poster presented at the Society for Neuroscience, San Diego, CA.
 19. Schultz D., Ito T., Solomyak L., Chen R., Mill R., Kulkarni K., **Cole M.W.** (November, 2016). Cognitive control network global connectivity is related to the mental health of healthy individuals. Poster presented at the Society for Neuroscience, San Diego, CA.
 20. Spronk M., Anticevic A., **Cole M.W.** (November, 2016). Cognitive control network flexible hub connectivity is altered across distinct mental illnesses. Poster presented at the Society for Neuroscience, San Diego, CA.
 21. Ito T., Schultz D., Solomyak L., Chen R., Mill R., **Cole M.W.** (August, 2016). Intrinsic functional connectivity shapes task information between networks. Poster presented at the Neural Computation and Psychology Workshop, Philadelphia, PA.
 22. **Cole M.W.**, Schultz D., Chen R., Kulkarni K., Ito T. (April, 2016). The cognitive relevance of resting-state fMRI: Spontaneously organized networks and brain states across rest and task. Talk presented at Cognitive Neuroscience Society, New York, NY.
 23. Chen R., Kulkarni K., Ito T., **Cole M.W.** (April, 2016). Spontaneously organized brain states revealed by dynamic multivariate pattern analysis of resting state fMRI. Poster presented at Cognitive Neuroscience Society, New York, NY.
 24. Mill R., Bagic A., Schneider W., **Cole M.W.** (April, 2016). Empirical validation of directed functional connectivity across fMRI and MEG. Poster presented at Cognitive Neuroscience Society, New York, NY.
 25. Schultz D., **Cole M.W.** (April, 2016). General intelligence and the efficiency of task-evoked brain network dynamics. Poster presented at Cognitive Neuroscience Society, New York, NY.

26. Chen R., Shafto P., **Cole M.W.** (October, 2015). Multivariate pattern analysis of resting state activity reveals spontaneously organized brain state dynamics. Poster presented at Society for Neuroscience, Chicago, IL.
27. Schultz D.H., **Cole M.W.** (October, 2015). Efficiency of brain network dynamics associated with cognitive ability. Poster presented at Society for Neuroscience, Chicago, IL.
28. Mill R., Bagic A., Schneider W., **Cole M.W.** (October, 2015). Exploiting sensory reactivation from memory to validate directed functional connectivity measures with fMRI and MEG. Poster presented at Society for Neuroscience, Chicago, IL.
29. **Cole M.W.**, Bassett D.S., Schultz D.H. (October, 2015). Intrinsic and dynamic functional network architectures shape task-evoked activation patterns in the human brain. Poster presented at Society for Neuroscience, Chicago, IL.

Ad Hoc Reviewer for Grants

The Wellcome Trust, 2017
The Netherlands Organization for Scientific Research, 2015
The United Kingdom Medical Research Council, 2015

Mentoring

Faculty:

Brian Keane (mentor on NIH K01)	2016-
Ravi Mill (research associate faculty)	2019-

Postdoctoral fellows:

Douglas Schultz (<i>moved on to assistant professor at University of Nebraska</i>)	2014-2018
Ravi Mill (<i>moved on to research associate faculty</i>)	Spring 2015-Fall 2019
Marjolein Spronk (<i>moved on to becoming a data scientist at Rancho BioSciences</i>)	2015-2017
Katelyn Arnemann (<i>moved on to becoming a data scientist at Data Cubed Health</i>)	Summer 2018-November 2019
Luke Hearne	Summer 2018-
Ruben Sanchez-Romero	Fall 2018-
Ethan McCormick	Spring 2020-
Matthew Singh	Spring 2021-

PhD students:

Richard Chen	Fall 2014-Spring 2021
Pinelopi Kyriazi	Fall 2014 (rotation)
Takuya Ito (<i>moved on to postdoc at Yale University</i>)	Fall 2015-Fall 2020
Carrisa Cocuzza	Fall 2016-
Katherine Wolfert	Fall 2017 (rotation)
Ian Kim	Fall 2018 (rotation)
Micah Ketola	Fall 2020-
Kirsten Petersen	Spring 2021-

Full-time research assistants at Rutgers University-Newark:

Levi Solomyak	2014-2016
Takuya Ito (<i>moved on to PhD in the lab</i>)	2014-2015

Kaustubh Kulkarni (<i>moved on to MD-PhD at Icahn School of Medicine at Mount Sinai</i>)	Fall 2015-Summer 2017
Julia Hamilton (<i>moved on to MD at Washington University</i>)	2017- 2019
Emily Winfield	Spring 2018-
Nicole Lalta	Summer 2020-

Undergraduate research assistants at Rutgers University-Newark:

Sara Horton (Summer 2015, Summer 2016), Braylan Zambrano (2016; received NSF LSAMP fellowship), Miguel Vivar (2016-2017; received McNair Scholar award, NSF LSAMP fellowship, and Aresty Fellowship), Ryan Welch (2015-2017; high school student), Nicole Lalta (2017-2020; NSF LSAMP fellowship), Yanira Sanchez (2018; NSF LSAMP fellowship), Aisha Assaf (2017-2019), Diana Rodas (2018-2020), Kirsten Petersen (2018-2020)

Member of Ph.D. thesis committee for:

Dana Mastrovito (2016-2018), Kainan Sally Wang (2017-2019), Hillary Levinson (2018-)

Outside member of Ph.D. thesis committee for:

Azeezat Azeez (NJIT, 2018-2019); Luke Hearne (The University of Queensland, 2017); Co-mentor and member of PhD committee for Alisha Janssen, clinical psychology PhD student at the Ohio State University (2014-2016)

Visiting scholars mentored:

Guochun Yang, Senne Braem, Mia Tharp, Hannah Bohle

Research assistants at Washington University (2009-2013):

Lauren Patrick, Nicholas Fazzio, Jordan Livingston, Takuya Ito, Lauren Ness, Maria Chushak, Cameron Smith

Research assistants at the University of Pittsburgh (2004-2009):

Eliezer Kanal, Sudhir Pathak, Amber Kunkel, Anderson Tesfazion

Teaching Experience

Spring 2020	Lead instructor for <i>Foundations in Neuroscience III</i> , a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
Fall 2018	Co-instructor for <i>Introduction to Neuroscience</i> , an undergraduate-level course at Rutgers University-Newark providing an introduction to neuroscience
Spring 2018	Co-instructor for <i>Foundations in Neuroscience III</i> , a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
Spring 2016	Course developer and instructor for <i>Network & Complexity Neuroscience</i> , a graduate-level course at Rutgers University-Newark
Fall 2015	Course developer and lead instructor for <i>Foundations in Neuroscience III</i> , a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
Spring 2015	Co-instructor for Critical Thinking in Neuroscience course, Rutgers University-Newark
Spring 2012	Co-instructor (with Todd Braver) for <i>Functional Neuroimaging</i> , Washington University in St. Louis

- 2011 Guest lecturer for *Cognitive Neuroscience* (Instructor: Todd Braver), Washington University in St. Louis
- 2010 Guest lecturer for *Cognitive Neuroscience* (Instructor: Todd Braver), Washington University in St. Louis
- Fall 2006 Teaching assistant for *Introduction to Neuroscience* (Instructor: David Wood), University of Pittsburgh
- Spring 2006 Guest lecturer for *Laboratory on fMRI Data Acquisition and Analysis* (Instructor: Walter Schneider), University of Pittsburgh
- Spring 2003 Teaching assistant for *The Neural Basis of Language and Thought* (Instructors: Jerome Feldman and George Lakoff), UC Berkeley
