

Associate Professor of Neuroscience and Psychology

Center for Molecular & Behavioral Neuroscience and Department of Psychology
Rutgers University-Newark

Education

- 2009 **University of Pittsburgh**
Ph.D. in Neuroscience and affiliated with the Center for the Neural Basis of Cognition and Carnegie Mellon University
- 2003 **University of California, Berkeley**
B.A. in Cognitive Science (Highest Honors)

Research and Work Experience

- 2021 – Present Affiliate Faculty of the Department of Psychology at Rutgers University-Newark
- 2019 – Present Associate Professor at the Center for Molecular & Behavioral Neuroscience (CMBN), Rutgers University-Newark. Director of the Cole Neurocognition Laboratory
- 2014 – 2019 Assistant Professor at the Center for Molecular & Behavioral Neuroscience (CMBN), Rutgers University-Newark. Director of the Cole Neurocognition Laboratory
- 2012 – 2013 Post-doctoral research with Steven Petersen (Neuroscience, Radiology, & Psychology, Washington University in St. Louis)
Investigations of brain network organization and cognitive control
- 2009 – 2013 Post-doctoral research with Todd Braver & Deanna Barch
(Department of Psychology, Washington University in St. Louis)
Investigations of prefrontal cortex, cognitive control, learning, schizophrenia, & intelligence
- 2004 – 2009 Ph.D. research with Walter Schneider (Department of Psychology, University of Pittsburgh)
Investigations of prefrontal cortex, cognitive control, & learning/memory
- 2001 – 2004 Undergraduate and post-baccalaureate research with Mark D'Esposito (Neuroscience and Psychology, UC Berkeley)
Investigations of prefrontal cortex and cognitive control
- 2003 Undergraduate research with William DeBello (Neuroscience, UC Davis)
Investigations of the genetic basis of learning and memory
- 2001 – 2003 Software engineering and web development for Apple, Inc.

Honors and Awards

- 2022 [Web of Science Highly Cited Researcher](#) in the field of Neuroscience and Behavior
Only 0.1% (or 1 in 1000) of all researchers earn this distinction
- 2019 Cognitive Neuroscience Society's Young Investigator Award
"Recognizes outstanding contributions by scientists early in their career"
- 2018 Center for the Neural Basis of Cognition (CNBC) Alumni Lecture (Pittsburgh, PA)
- 2015 Elected to be member of the Cognitive Neuroscience Society's Symposium Committee
- 2011 Fellow at the Summer Institute in Cognitive Neuroscience, Santa Barbara, CA

- 2010 NeuroImage Editor's Choice Award
For Cole et al. 2010, "Identifying the brain's most globally connected regions"
Awarded by the editors in acknowledgment of a study's importance and high impact
- 2007 National Science Foundation Integrative Graduate Education and Research Traineeship (IGERT) Fellowship
- 2005-2008 National Science Foundation Graduate Research Fellowship
- 2003 Highest Honors in Cognitive Science at UC Berkeley

Organizational Leadership and Professional Memberships

- 2018 – Present Associate Member of the Institute for Brain and Neuroscience Research (New Jersey Institute of Technology)
- 2016 – Present Founder and organizer (along with Drew Headley) of the Integrative Neuroscience Discussion Group (INDG) at the Center for Molecular & Behavioral Neuroscience. This is a group that seeks to develop unified understandings between human and non-human (animal and computational models) neuroscience and psychology.
- 2015 – Present Member and co-organizer of Newark Brain Connectivity meetings. These meetings bring together scientists interested in brain connectivity research from Newark, NJ and the surrounding region (such as neuroscientists and psychologists from Rutgers University and New Jersey Institute of Technology).
- 2004 – Present Society for Neuroscience
Cognitive Neuroscience Society
- 2010 – Present Psychonomic Society
- 2009 – Present Neuroethics Society
- 2006 – Present Organization for Human Brain Mapping
- 2004 – 2009 Center for the Neural Basis of Cognition, Carnegie Mellon & University of Pittsburgh
Center for Neuroscience, University of Pittsburgh
Learning Research and Development Center
- 2006 – 2007 President of the Department of Neuroscience Graduate Student Organization, University of Pittsburgh
- 2002 – 2003 President of the Cognitive Science Student Association, UC Berkeley

Research Grants and Fellowships

Principal Investigator: "Brain network mechanisms of task-general cognition", National Science Foundation – Cognitive Neuroscience, Division of Behavioral & Cognitive Sciences (BCS), 2219323 2022-2025

Total cost: \$625,000

Converging evidence has demonstrated that general human intelligence is primarily implemented by activity and connectivity in subnetworks of the brain termed cognitive control networks (CCNs). However, there is a critical need to determine how CCN activity and connectivity together generate intelligent goal-directed behavior. This project will use brain imaging and brain stimulation to determine how CCNs implement intelligent behavior across a wide variety of tasks.

<u>Co-Principal Investigator</u> : "MRI: Acquisition of a High-Performance Computing Cluster for Research and Teaching at Rutgers University-Newark", National Science Foundation – Office of Advanced Cyberinfrastructure (OAC) 2117429, PI: Michele Pavanello, Total cost: \$559,288	2021-2024
<u>Participating faculty</u> : "Graduate Research Training Initiative for Student Enhancement (G-RISE) (T32) at Rutgers University-Newark", National Institutes of Health, PI: Barry Komisaruk, Total cost: \$2,353,390	2021-2026
<u>Co-Principal Investigator</u> : "Major Research Instrumentation: Acquisition of a 3T SIEMENS PRISMA at RUBIC: The Evolution to a Regional Center", National Science Foundation – Division of Behavioral & Cognitive Sciences (BCS) 1919873, PI: Stephen Hanson, Total cost: \$1,484,000. <u>Status</u> : Completed.	2019-2021
<u>Co-Principal Investigator</u> : "Negative Affect Mechanisms Underlying Opioid Use in Lab and Daily Life", Rutgers University-Newark Initiative for Multidisciplinary Research Teams Award, PI: Mauricio Delgado.	2019-2021
<u>Co-Principal Investigator</u> : "Major Research Instrumentation: Acquisition of a GPU cluster to support interdisciplinary research in human learning, machine learning, and data science", National Science Foundation – Division of Behavioral & Cognitive Sciences (BCS) 1828528, PI: Patrick Shafto, Total cost: \$99,999. <u>Status</u> : Completed.	2018-2021
<u>Co-Investigator</u> : "Imaging the effects of psychosocial stress on cognitive performance", National Science Foundation – Division of Behavioral & Cognitive Sciences (BCS) 1756065, PI: Elizabeth Tricomi, Total cost: \$408,699. <u>Status</u> : Completed.	2018-2021
<u>Co-Investigator</u> : "Prescription opiate, drug-cue processing network, and neural connectivity", National Institutes of Health – National Institute on Drug Abuse (I/START R03 DA044496), PI: Suchismita Ray, Total direct cost: \$161,644. <u>Status</u> : Completed.	2017-2018
<u>Principal Investigator</u> : "Brain Network Mechanisms of Aging-Related Cognitive Decline", National Institutes of Health – National Institute on Aging (R01 AG055556), Total direct cost: \$250,000/year The goal of this research is to identify network mechanisms that can account for the alterations in both intrinsic brain connectivity and cognitive task activations that occur with aging-related decline of cognitive control abilities among healthy older adults.	2017-2023
<u>Principal Investigator</u> : "Brain Network Mechanisms of Instructed Learning", National Institutes of Health – National Institute of Mental Health (R01 MH109520), Total direct cost: \$250,000/year. <u>Status</u> : Completed. The goal of this research is to utilize the tools of network neuroscience to improve understanding of how instructed learning is implemented in the human brain, from initial learning to expertise.	2016-2022
<u>Co-Principal Investigator</u> : "Integrated Framework for Studying Proactive Control in Rapid Instructed Task Learning", United States – Israel Binational Science Foundation (BSF 2015186), Total cost: \$200,000. <u>Status</u> : Completed.	2016-2021
<u>Collaborator</u> : "Neuropsychiatric Classification via Connectivity and Machine Learning", National Institutes of Health (NIH) – National Institute of Mental Health (R03 MH105765), PI: Alan Anticevic, Total cost: \$74,000/year. <u>Status</u> : Completed.	2014-2016
<u>Principal Investigator</u> : "Network Mechanisms of Flexible Cognitive Control", National Institutes of Health – National Institute of Mental Health (K99-R00 MH096801), Total direct cost: \$157,000/year. <u>Status</u> : Completed. This project investigates the hypothesis that flexible cognition and behavior is supported by flexible hubs – frontoparietal brain regions with extensive global brain connectivity that flexibly updates according to task demands.	2012-2017

Principal Investigator (fellowship): "Beyond Localization of Memory Functions: Learning Statistical Methods for Estimating Directed Connectivity among Cortical Regions Using Multiple Neuroimaging Technologies", National Science Foundation (IGERT Fellowship), 2007
Funded amount: \$30,000. Status: Completed.

The goal of this research is to learn methodological techniques for estimating directed functional (effective) connectivity and empirically test the efficacy of those techniques using functional MRI and magnetoencephalography.

Principal Investigator (fellowship): "Dissociating the Network Components Underlying Cognitive Control", National Science Foundation (Graduate Research Fellowship), 2005-2008
Funded amount: \$90,000. Status: Completed.

The goal of this project is to utilize experimental manipulations of cognitive control processes with functional MRI to identify the shared and specialized roles of cognitive control network brain regions.

Invited Talks and Symposia

1. The cognitive and aging-related clinical relevance of brain network organization. Growing Up In Aging Neuroscience, Providence, RI. (May 2022)
2. The cognitive and clinical relevance of brain network organization. Department of Psychiatry, Columbia University, New York, NY. (August 2021)
3. The cognitive and clinical relevance of brain network organization. Center for Neuromodulation in Depression and Stress, University of Pennsylvania, Philadelphia, PA. (July 2021)
4. Brain network organization as the computational architecture of cognition. Invited talk presented at the Montreal Neurological Institute-Hospital (MNI), Montreal, Quebec, Canada. (November 2019)
5. Brain network organization as the computational architecture of cognition: Implications for mental health. Invited talk presented at the Rutgers-Princeton Center for Computational Cognitive Neuro-Psychiatry, Piscataway, NJ. (November 2019)
6. Brain network organization as the computational architecture of cognition: Implications for emotion regulation and mental health. Invited virtual talk presented at the Sapiens Labs' Inter and Intra Person Variability Symposium. (November 2019)
7. Brain network organization as the computational architecture of cognition: Implications for emotion regulation and mental health. Invited talk presented at the Social & Affective Neuroscience Society conference, Miami, FL. (May 2019)
8. Brain network organization as the computational architecture of cognition. Invited talk presented at the Cognitive Neuroscience Society conference, San Francisco, CA. (March 2019)
9. Brain network organization as the computational architecture of cognition. Invited talk presented at Georgia Institute of Technology, Atlanta, GA. (March 2019)
10. The Cognitive and Computational Relevance of Functional Brain Networks. Invited talk presented at New York University (NYU) School of Medicine, New York, NY. (April 2018)

11. The Cognitive and Computational Relevance of Functional Brain Networks. Invited CNBC Alumni Talk presented at the Center for the Neural Basis of Cognition (CNBC), University of Pittsburgh and Carnegie Mellon University, Pittsburgh, PA. (April 2018)
12. Neural and cognitive bases of rational and critical thinking. Invited talk presented at Columbia University, New York, NY. (November 2017)
13. The Cognitive Relevance of Functional Brain Networks. Invited talk presented at Carnegie Mellon University, Pittsburgh, PA. (March 2017)
14. Stable and Dynamic Functional Brain Network Architectures Underlying Flexible Cognition. Invited talk presented at Vanderbilt University, Nashville, TN. (February 2017)
15. Functional Brain Network Mechanisms Underlying Flexible Cognitive Control. Invited talk presented at the Control Processes Conference in San Diego, CA. (November 2016)
16. Stable and Dynamic Functional Brain Network Architectures Underlying Flexible Cognition. Invited talk presented at the Cognitive Neuroscience Seminar Series at Taub Institute, Columbia Medical School, New York, NY. (October 2016)
17. Brain network mechanisms of rapid instructed task learning. Invited talk presented at the Attention & Performance Conference, Turnhout, Belgium. (June 2016)
18. Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at Humbolt University, Berlin, Germany. (May 2016)
19. Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at the Dresden Symposium on Volition and Cognitive Control, Dresden, Germany. (July 2015)
20. Brain network mechanisms of flexible cognitive control in health and disease. Talk presented at Weil Cornell, New York, NY. (April 2015)
21. Flexible Learning: Understanding Cognitive Control and Intelligence in the Brain. Talk presented at Rutgers Research Day, Newark, NJ. (April 2015)
22. Human brain network dynamics and goal-directed cognition. Talk presented at Newark NeuroTalks, Newark, NJ. (March 2015)
23. Functional connectivity differences in brain networks: contributions of shared and unshared variance. Invited talk presented at the Asilomar conference, Pacific Grove, CA. (November 2014)
24. Multi-task functional connectivity and flexible hubs. Invited talk presented at the International Conference on Cognitive Neuroscience (ICON), Brisbane, Australia. (August 2014)
25. Intrinsic and dynamic brain network architectures underlying adaptive behavior in humans. Invited talk presented at the Princeton Neuroscience Institute, Princeton, NJ. (June 2014)
26. Intrinsic and task-evoked network architectures of the human brain. Invited talk presented at the Nathan S. Kline Institute (NKI), Orangeburg, NY. (May 2014)
27. Flexible Thinking: Understanding Cognitive Control and Intelligence in the Brain. Invited talk presented at the Learning and the Brain conference, New York, NY. (May 2014)
28. Intrinsic and Dynamic Network Architectures of the Human Brain. Invited talk presented at the Psychology Department, UC Berkeley, Berkeley, CA. (November 2013)
29. Brain Network Mechanisms of Flexible Cognitive Control in Health and Disease. Invited talk presented at the Department of Psychiatry, Yale, New Haven, CT. (April 2013)
30. Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at the McGovern Institute for Brain Research, MIT, Cambridge, MA. (January 2013)
31. A role for the brain network mechanisms of flexible cognitive control in human intelligence. Invited talk presented at the International Society for Intelligence Research, San Antonio, TX. (December 2012)
32. Global Brain Connectivity and Other Graph Theoretical Approaches: Methods and Findings. Invited talk/workshop presented at the MRI Users' Meeting Group, The Ohio State University, Columbus, OH. (November 2012)
33. Brain Network Mechanisms of Flexible Cognitive Control. Invited talk presented at the Center for Molecular and Behavioral Neuroscience, Rutgers, Newark, NJ. (November 2012)

34. Investigating Global Brain Connectivity: Methods, Software, and Findings. Talk presented at the Neuroimaging Informatics and Analysis Center seminar series, Washington University, St. Louis, MO. (March 2011)
35. Multiple Network Mechanisms Underlying Flexibility in Prefrontal Cortex. Talk presented at the Brain, Behavior, and Cognition seminar series, Washington University, St. Louis, MO. (March 2010)
36. Network Mechanisms Underlying Flexibility in Prefrontal Cortex. Invited talk presented as part of the Center for Mind and Brain seminar series, UC Davis, Davis, CA. (January 2010)
37. Source Localization with MEG: An MNE Software Overview. Talk presented for the University of Pittsburgh MEG center, Pittsburgh, PA. (May 2008)
38. Connectomics of the Human Cognitive Control Network. Invited talk presented for Beatriz Luna's lab, Pittsburgh, PA. (January 2008)
39. Using Functional MRI to Inform Neural Models of Decision Making. Talk presented at the annual CNBC retreat, Pittsburgh, PA. (October 2006)
40. Specialization and integration within a cortical cognitive control network. Talk presented at the CNBC 'Brain Bag', Pittsburgh, PA. (October 2006)
41. Innate functional connectivity from resting state linear correlations. Invited talk presented at the Clinical Cognitive Neuroscience Lab's Methods Monday forum, Pittsburgh, PA. (March 2006)
42. Dissociations in Cognitive Control: The Specialized Roles of Lateral and Medial Prefrontal Cortex. Talk presented at the Cognitive Psychology 'Brown Bag', Pittsburgh, PA. (November 2005)
43. Results and statistics in fMRI. Talk presented at the 2005 CNBC fMRI Workshop, Pittsburgh, PA. (October 2005)

Service to Grant-issuing Institutions

Grant Review Panel Member

The US National Institutes of Health (NIH), ad hoc member of Cognition & Perception (CP) study section, 2020
The US National Institutes of Health (NIH), Biobehavioral Processes of Cognition and Stress special emphasis panel, 2020
The US National Science Foundation (NSF), Integrative Strategies for Understanding Neural and Cognitive Systems (NCS) panel, 2018
The US National Institutes of Health (NIH), ad hoc member of Cognition & Perception (CP) study section, 2018 (2x)
The US National Science Foundation (NSF), special BRAIN Initiative panel, 2017
The Busch Biomedical Grant Program, 2016

Ad Hoc Reviewer for Grants

The Wellcome Trust, 2017
The Netherlands Organization for Scientific Research, 2015
The United Kingdom Medical Research Council, 2015

Other service

External reviewer for tenure and promotion decisions at: University of Pittsburgh (2020), Tel-Aviv University (2022)

Mentoring

Faculty:

Brian Keane (mentor on NIH K01)	2016-2020
Ravi Mill (research associate faculty)	2019-

Postdoctoral fellows:

Douglas Schultz (<i>moved on to assistant professor at University of Nebraska</i>)	2014-2018
Ravi Mill (<i>moved on to research associate faculty in lab</i>)	Spring 2015-Fall 2019
Marjolein Spronk (<i>moved on to becoming a data scientist at Rancho BioSciences</i>)	2015-2017
Katelyn Arnemann (<i>moved on to becoming a data scientist at Data Cubed Health</i>)	Summer 2018-Fall 2019

Luke Hearne	Summer 2018-
Ruben Sanchez-Romero	Fall 2018-
Ethan McCormick (<i>moved on to postdoc at Radboud University Medical Center, then assistant professor at University of Leiden</i>)	Spring 2020-Spring 2021
Matthew Singh	Spring 2021-
Ella Podvalny	Summer 2021-

PhD students:

Richard Chen	Fall 2014-Spring 2021
Pinelopi Kyriazi	Fall 2014 (rotation)
Takuya Ito (<i>moved on to postdoc at Yale University</i>)	Fall 2015-Fall 2020
Carrisa Cocuzza	Fall 2016-
Katherine Wolfert	Fall 2017 (rotation)
Ian Kim	Fall 2018 (rotation)
Micah Ketola (<i>master's degree; moved on to be a software engineer at Prudential</i>)	Fall 2020-Fall 2022
Kirsten Petersen	Spring 2021-
Lakshman Chakravarthy	Fall 2022-
Alexandros Tzalavras	Fall 2022-

Full-time research assistants at Rutgers University-Newark:

Levi Solomyak	2014-2016
Takuya Ito (<i>moved on to PhD in the lab</i>)	2014-2015
Kaustubh Kulkarni (<i>moved on to MD-PhD at Icahn School of Medicine at Mount Sinai</i>)	Fall 2015-Summer 2017
Julia Hamilton (<i>moved on to MD at Washington University</i>)	2017- 2019
Emily Winfield (<i>moved on to a data science position in industry (at Aquant)</i>)	Spring 2018-Spring 2021
Nicole Lalta	Summer 2020-Summer 2022

Undergraduate research assistants at Rutgers University-Newark:

Sara Horton (Summer 2015, Summer 2016), Brayon Zambrano (2016; received NSF LSAMP fellowship), Miguel Vivar Lazo (2016-2017; McNair Scholar award, NSF LSAMP fellowship, Aresty Fellowship), Ryan Welch (2015-2017; high school student), Nicole Lalta (2017-2020; NSF LSAMP fellowship), Yanira Sanchez (2018; NSF LSAMP fellowship), Catalina Guzman (2018-2019; NSF LSAMP fellowship), Aisha Assaf (2017-2019), Diana Rodas (2018-2020; NSF LSAMP fellowship), Kirsten Petersen (2018-2020), Jada White (2021; NSF LSAMP fellowship), Willio Jeanvilma (2021; NSF LSAMP fellowship), Avi Shah (2020-2021), Akshay Warriar (2021-2022), Aditya Rao (2021-2022), Edwin Lotero (2021-2022; NSF LSAMP fellowship), Adeola Ajiboro (2022-; NSF LSAMP fellowship), Gifty Jones (2023-; NSF LSAMP fellowship)

Member of Ph.D. thesis committee for:

Dana Mastrovito (2016-2018), Kainan Sally Wang (2017-2019), Hillary Levinson (2018-2020), Shira Lupkin (2021-)

Outside member of Ph.D. thesis committee for:

Azeezat Azeez (NJIT, 2018-2019), Luke Hearne (The University of Queensland, 2017), Alisha Janssen (The Ohio State University, 2014-2016), Lam Lok Hang (The Hong Kong Polytechnic University, 2022)

Visiting scholars mentored:

Guochun Yang, Senne Braem, Mia Tharp, Hannah Bohle

Research assistants at Washington University (2009-2013):

Lauren Patrick, Nicholas Fazzio, Jordan Livingston, Takuya Ito, Lauren Ness, Maria Chushak, Cameron Smith

Research assistants at the University of Pittsburgh (2004-2009):
Eliezer Kanal, Sudhir Pathak, Amber Kunkel, Anderson Tesfazion

Teaching Experience

- Spring 2022 Course developer and instructor for *Network & Complexity Neuroscience*, a graduate-level course at Rutgers University-Newark
- Fall 2021 Co-instructor for *Foundations in Neuroscience III*, a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
- Spring 2020 Lead instructor for *Foundations in Neuroscience III*, a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
- Fall 2018 Co-instructor for *Introduction to Neuroscience*, an undergraduate-level course at Rutgers University-Newark providing an introduction to neuroscience
- Spring 2018 Co-instructor for *Foundations in Neuroscience III*, a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
- Spring 2016 Course developer and instructor for *Network & Complexity Neuroscience*, a graduate-level course at Rutgers University-Newark
- Fall 2015 Course developer and lead instructor for *Foundations in Neuroscience III*, a graduate-level course at Rutgers University-Newark providing an introduction to cognitive neuroscience
- Spring 2015 Co-instructor for Critical Thinking in Neuroscience course, Rutgers University-Newark
- Spring 2012 Co-instructor (with Todd Braver) for *Functional Neuroimaging*, Washington University in St. Louis
- 2011 Guest lecturer for *Cognitive Neuroscience* (Instructor: Todd Braver), Washington University in St. Louis
- 2010 Guest lecturer for *Cognitive Neuroscience* (Instructor: Todd Braver), Washington University in St. Louis
- Fall 2006 Teaching assistant for *Introduction to Neuroscience* (Instructor: David Wood), University of Pittsburgh
- Spring 2006 Guest lecturer for *Laboratory on fMRI Data Acquisition and Analysis* (Instructor: Walter Schneider), University of Pittsburgh
- Spring 2003 Teaching assistant for *The Neural Basis of Language and Thought* (Instructors: Jerome Feldman and George Lakoff), UC Berkeley
